JOURNAL OF MOLECULAR STRUCTURE, CUMULATIVE INDEX FOR VOLUMES 173, 174 AND 175 (1988)

SUBJECT INDEX FOR THE THREE VOLUMES OF THE XVIIIth EUROPEAN CONGRESS ON MOLECULAR SPECTROSCOPY

Acetonitrile,
infrared, calorimetry and p_aH correlation of hydrogen bonding in (-N-OH$^+$...$^-$O-) and (≡NH$^+$... O-) bridges in acetonitrile 175, 245

Acylonium salts,
structure and hindered internal rotation in acylonium salts 174, 309

$AgNO_3$,
phase transition investigation of $AgNO_3$ at low temperature and high pressure by IR studies 175, 395

Alcohols,
structural information from integrated infrared intensities of some alcohols with a triple bond 175, 239

Aldehydes,
studies of the characteristic frequencies of vapor-phase infrared spectra. II. The characteristic frequencies of ketones and aldehydes 175, 359

Aliphatic azides,
UVPES of some aliphatic azides. Part I. 175, 417

Alkali metal,
vibrational spectra of alkali metal cyclopentadienides and force field calculation of free cyclopentadienyl anion 175, 165

Alkenylphosphonates,
SCF-MO calculations and NMR measurements for alkenylphosphonates 174, 267

Amides,
hydrogen bonding in liquid amides studied by low frequency Raman spectroscopy 175, 251

Amine inversion vibration,
calculation of the transitions in the amine inversion vibration of some local anesthetics 175, 81

Amines,
the effects of structure and intermolecular hydrogen bonding on molecular reorientation times of the series of amines and hydrazines 174, 303

Amino acid amide group,
hydrogen bonding between nucleic acid constituents and amino acid amide group 175, 283

Aminopyridines,
infrared and Raman spectroscopic investigations of cadmium tetracyanonickelate complexes of aminopyridines 175, 365

Ammonium halides,
the influence of disorder on the group-theoretically derived selection rules in ammonium halides 175, 459

Amorphous solids,
statics and dynamics of amorphous solids studied by photoburning of persistent spectral holes (PPSH) 174, 77
Amphiboles,
Raman and infrared spectroscopic investigation of the cation distributions in amphiboles 175, 183
Anesthetics,
calculation of the transitions in the amine inversion vibration of some local anesthetics 175, 81
Anthracene-metallic cation interactions,
by UV-Vis spectroscopy 175, 323
Apoprotein,
conformational structure of the central nervous system proteolipid apoprotein. A Raman and infrared spectroscopic study 175, 43
Azaaromatic / metal oxide adsorbates,
nanosecond time-resolved fluorescence studies on the excited-state relaxation of azaaromatic / metal oxide adsorbates 175, 117

Band-fitting analysis,
the band-fitting analysis of the Raman spectra close to phase transitions 175, 465
Base — HF complexes,
FTIR spectra of base — HF complexes in noble gas matrices 173, 103
Benzene,
spectroscopic investigations of matrix isolated adducts between metal vapors of chromium and benzene 174, 17
Benzene chemisorption,
FTIR study of benzene chemisorption on Pt/SiO_2 174, 395
Benzensulphonamide inhibitors,
multinuclear NMR and vibrational spectroscopy studies of the substituent effects in benzensulphonamide inhibitors of the enzyme carbonic anhydrase 175, 37
Benzoic acid,
effect of ionic potentials of metals on perturbation of the aromatic system of benzoic acid 174, 201
Benzoic acids,
comparison of the effect of lanthanides (Ln), d-transition metals and selected metals of the main groups on the aromatic system of salicyclic and benzcic acids 174, 417
Benzyls,
hyperconjugative interactions in benzyls studied by means of ionization energy and electron affinity measurements 174, 177
N-Bicyclo substituted,
synthesis and spectroscopic study of some new rigid N-bicyclo substituted 2-phenylacetamides 174, 255
Bilirubin,
resonance Raman and electronic absorption spectroscopy of bilirubin in solution. An experimental and theoretical study 174, 153
Biomolecular structures,
determination of biomolecular structures from proton-proton NOE'S using a relaxation matrix approach 173, 299

Boron trifluoride dimer,
matrix isolation infrared spectrum and ab initio calculations of the boron trifluoride dimer. Tentative assignments 173, 337
Bromine,
a photoelectron spectroscopic study of molecular chlorine and bromine using three-photon resonant multiphoton ionization 174, 171

Cadmium tetracyanonickelate,
infrared and Raman spectroscopic investigations of cadmium tetracyanonickelate complexes of aminopyridines 175, 365
Caffeine,
self-association of caffeine in aqueous solution. Study of dilute solutions by normal and second derivative UV absorption spectroscopy 175, 25
Calcium oxide,
uniaxial stress effects on the zero-phonon line emission of the O_2^- defect in calcium oxide 174, 117
Carbonic anhydrase,
multinuclear NMR and vibrational spectroscopy studies of the substituent effects in benzensulphonamide inhibitors of the enzyme carbonic anhydrase 175, 37
Carbon monoxide,
single photon multiionisation of carbon monoxide using synchrotron radiation 174, 141
Carbonyls,
dynamics of metal carbonyls on the infrared time scale: coalescence of CO stretching vibrational bands 174, 107
Carbonyl species,
time-resolved infrared spectroscopy of transient metal carbonyl species in the gas phase 174, 113
Carboxylic acids,
correlation of ultraviolet absorption frequencies of phenyl substituted 2-phenyl-α , β-unsaturated carboxylic acids with Hammett substituent constants 174, 247
CCl_4 matrices,
structure and dynamics of solid CCl_4 matrices doped with acetonitrile 174, 89
CF_3,
torsional transitions and barriers to internal rotation of some molecules with CF_3 rotors 174, 183
$\{(\eta\text{-}C_5H_5)Fe(CO)_2\}_2$,
infrared spectra and structure of $\{(\eta\text{-}C_5H_5)Fe(CO)_2\}_2$ adsorbed on oxide surfaces 174, 325
Chlorine,
a photoelectron spectroscopic study of molecular chlorine and bromine using three-photon resonant multiphoton ionisation 174, 171
1-Chloro-4-fluorobut-2-yne,
vibrational spectra and conformations of 1-chloro-4-fluorobut-2-yne 174, 215
3-Chlorothiophene,
the microwave spectrum of 3-chlorothiophene 174, 285
Chromium,
spectroscopic investigations of matrix isolated adducts between metal vapors of chromium and benzene 174, 17

Cinnamic acids,
correlation of ultraviolet absorption frequencies of cis and trans substituted cinnamic acids with Hammett substituent constants 174, 251
Circular polarization attachments,
circular polarization attachments for FTIR spectrometers 175, 407
Cluster compounds,
characterization of the "surface enhanced Raman scattering" by use of Raman-spectroscopic and quantum mechanical investigations of simple cluster compounds 174, 59
Condensed phases,
on the contour of overlapping vibrational bands in condensed phases 175, 339
Cordierite aerogel,
FT-IR investigation of cordierite aerogel 175, 401
CO stretching,
dynamics of metal carbonyls on the infrared time scale: coalescence of CO stretching vibrational bands 174, 107
Cs_2NaYCl_6,
absorption and luminescence spectra of U^{3+} in Cs_2NaYCl_6 174, 443
Cyclohexyl azide,
the IR and Raman spectra and conformations of cyclohexyl azide 174, 207
Chemisorption,
symmetry rules in chemisorption 173, 157
Clusters,
high resolution laser spectroscopy as a tool to investigate dynamics in large molecules and molecular clusters 173, 201
Conformational stabilities,
changes in structural parameters with conformational changes and the determination of conformational stabilities by molecular spectroscopic techniques 173, 1
Core and valence excited states,
molecular spectroscopy and dynamics of core and valence excited states by electron scattering and synchrotron radiation 173, 269
Cyclic 2-tetrazenes,
electronic structures and thermolyses of cyclic 2-tetrazenes 175, 423
Cyclobutane derivatives,
conformational behaviour of five cyclobutane derivatives 173, 389
Cyclopentadienides,
vibrational spectra of alkali metal cyclopentadienides and force field calculation of free cyclopentadienyl anion 175, 165

Decomposing overlapping bands,
a comparison of methods for decomposing overlapping bands in Raman spectra 174, 101
Detergent,
interaction of SDS with β-galactosidase. A FT-IR study of the influence of detergent concentration and temperature 175, 67
Diamines,
vibrational investigation of aromatic diamines reactive intermediates 175, 1
Diazines,
SER spectra of diazines adsorbed on silver sols: spectroscopic evidence of reduction products 174, 351

1,3-Dibromo-2,2-dimethylpropane,
vibrational spectra and conformations of 1,3-dibromo-2,2-dimethylpropane (DBDMP) and 2,2-di(fluoromethyl)-1,3-difluoropropane (TFN) 174, 259

Dichlorocyclopentylphenyl tertiary phosphine complexes,
the low frequency vibrational spectra of some dichlorocyclopentylphenyl tertiary phosphine complexes of palladium(II) and platinum(II) 174, 407

Differential FTIR spectroscopy,
differential FTIR spectroscopy with polarized radiation 174, 147

2,2-Di(fluoromethyl)-1,3-difluoropropane,
vibrational spectra and conformations of 1,3-dibromo-2,2-dimethylpropane (DBDMP) and 2,2-di(fluoromethyl)-1,3-difluoropropane (TFN) 174, 259

Dilute solutions,
on the infrared absorption profiles of dilute solutions 174, 41

Disulfur dichloride,
infrared and Raman matrix isolation spectra and molecular force field of disulfur dichloride 175, 105

Dynamics,
high resolution laser spectroscopy as a tool to investigate dynamics in large molecules and molecular clusters 173, 201

Electron spin echo spectroscopy,
electron spin echo spectroscopy of the photo-excited triplet state of pyridine 173, 249

Ethanes,
torsional transitions in the conventional Raman spectrum of ethanes 174, 319

N-Ethylacetamide,
hydrogen bonding of N-monosubstituted amides. IR study of N-ethylacetamide and N-methylpropionamide 174, 129

Excited states,
infrared spectroscopy of excited states and transients in photochemistry 173, 51

Ferriporphyrins,
resonance Raman evidence for μ-oxo linkage in ferriporphyrins 175, 55

Flash photolysis,
flash photolysis electron spin resonance 173, 237

Force field calculations,
new aspects in force field calculations 173, 253

Formamide,
molecular aggregation of ionic surfactants in formamide studied by laser Raman spectroscopy 174, 195

Fourier transform methods,
Fourier transform methods for spectral resolution enhancement 173, 285

Four-level systems,
general dynamics of four-level systems including relaxation 174, 241

β-Galactosidase,
interaction of SDS with β-galactosidase. A FT-IR study of the influence of detergent concentration and temperature 175, 67
Gas phase reactions,
optimization of gas phase reactions using real-time PES analysis: short-lived molecules and heterogeneously catalyzed processes 173, 31
5'-GMP,
Fourier transform infrared studies of 5'-GMP in ^2H_2O and H_2O solutions 175, 49

HC_3N,
ab initio molecular orbital calculations of the polar tensors and vibrational intensities of HC_3N 175, 355
HCN...HCN and HCN...HNC linear complexes,
an ab initio spectroscopic study of the HCN...HCN and HCN...HNC linear complexes 175, 303
Hexane,
electronic absorption spectrum of radiation-produced pentane and hexane radical cations in saturated chlorofluorocarbon and perfluorocarbon matrices at 77 K 175, 97
n-Hexane,
temperature dependent site structure of the phenalenyl radical in n-pentane and n-hexane Shpol'skii matrices 174, 23
HF and DF,
tunneling and shape resonance phenomena in the UV photoelectron spectra of HF and DF 173, 221
High performance thin-layer chromatography (HPTLC),
combining surface enhanced Raman scattering (SERS) and high-performance thin-layer chromatography (HPTLC) 173, 369
Human growth hormone,
the Raman spectrum of biosynthetic human growth hormone. Its deconvolution, bandfitting, and interpretation 175, 73
Hydrazines,
the effects of structure and intermolecular hydrogen bonding on molecular reorientation times of the series of amines and hydrazines 174, 303
Hydrogen and proton transfer reactions,
a search for pure compounds suitable for use as matrix in spectroscopic studies of radiation-produced radical cations. III. A selection of compounds based on the thermochemistry of hydrogen and proton transfer reactions between neutral molecules and their cations 173, 329
9-(2'-Hydroxyethyl)-9-azabicyclo{3.3.1} nonan-3α-ol,
synthesis and structural study of 9-(2'-hydroxyethyl)-9-azabicyclo {3.3.1} nonan-3α-ol 174, 273
Hydroxy groups,
FT-IR study of the δ(OH) mode of surface hydroxy groups on metal oxides 175, 453

Ice polymorphs: V and VI,
the Raman spectra of the KOH-doped ice polymorphs: V and VI 175, 289

Inclusion compounds,
clathrate and inclusion compounds. Part 10. Solid state ^{13}C NMR studies of inclusion compounds 174, 229
Intensity parameters,
comparison of experimental and "ab initio" intensity parameters 174, 47
Interconversion of conformers,
interconversion of conformers by infrared radiation: a theoretical approach based on symmetry of non-rigid molecules 173, 91
Intermolecular hydrogen bonding,
spectral and thermodynamic characteristics of intermolecular hydrogen bonding in individual and mixed solvents 175, 307
Iodine B state,
laser induced fluorescence of the iodine B state. Lifetimes of weakly-predissociated levels 175, 7
Ionic surfactants,
molecular aggregation of ionic surfactants in formamide studied by laser Raman spectroscopy 174, 195
IR,
IR study of hydrogen bonds formed by π-complexes of transition metals in liquid xenon solution 174, 29

Ketones,
studies of the characteristic frequencies of vapor-phase infrared spectra. II. The characteristic frequencies of ketones and aldehydes 175, 359

KH,
new self-consistent potentials for the $X^1\Sigma^+$ and $A^1\Sigma^+$ states of KH 175, 209
K_2SO_4 and $KClO_4$ crystals,
temperature dependent dephasing of internal phonons in ionic crystals: picosecond CARS measurements in K_2SO_4 and $KClO_4$ crystals 175, 123

β-Lactam derivatives,
amide resonance and FT-IR spectra of some β-lactam derivatives: application of resolution enhancement procedures in Fourier space 174, 123
Lanthanide perchlorates,
spectroscopic properties of lanthanide perchlorates in nonaqueous solutions 174, 473
Lanthanide(III) systems,
problem of asymmetry in electronic Raman scattering of lanthanide(III) systems 175, 13
Lithium sublattice,
detection of an ordering of lithium sublattice in $LiKSO_4$ in low-temperature phases via Raman scattering 175, 129

Magnesium oxide,
FT-IR characterization of adsorption complexes on magnesium oxide surfaces 174, 343
Main group,
electronic structures of analogous and isoelectronic main group and transition metal compounds - a gas phase (UV)-photoelectron spectroscopic and theoretical study 175, 441

Mass-weighted squared effective charges,
interpretation of infrared intensities. I. Mass-weighted squared effective charges 173, 357

Melittin-lipid interactions,
melittin-lipid interactions: a FT-IR spectroscopic study 175, 371

Metal single crystal surfaces,
reflection absorption infrared spectroscopy of adsorbates on metal single crystal surfaces 173, 405

4-Methoxybenzylidene-4'-butylaniline (MBBA) fluorinated analogues,
conformational analysis of 4-methoxybenzylidene-4'-butylaniline (MBBA) fluorinated analogues by ^{1}H and ^{13}C-NMR 174, 297

Methyl alkyl ketones,
solvent influence on infrared spectra of the carbonyl stretching band in methyl alkyl ketones 175, 313

N-Methyl-N-cycloalkyl substituted,
configurations in unsymmetrically N-methyl-N-cycloalkyl substituted 2-phenylacetamides 174, 315

N-Methylpropionamide,
hydrogen bonding of N-monosubstituted amides. IR study of N-ethylacetamide and N-methylpropionamide 174, 129

Molecular complexes,
influence of reaction rates on Raman spectra of molecular complexes 175, 383

N_2/rare-gas mixed crystals,
Raman studies on N_2/rare-gas mixed crystals 174, 11

N_3,
MRD-CI ground state geometry and vertical spectrum of N_3 175, 215

Neodymium(III) azide,
spectroscopic studies and crystal field investigations on a complex neodymium(III) azide 174, 429

$(NH_4)_2HPO_4$ and $(ND_4)_2DPO_4$,
vibrational study of $(NH_4)_2HPO_4$ and $(ND_4)_2DPO_4$ single crystals. The PO_4 ion vibration couplings 175, 295

Ni(110) surface,
theoretical investigation of adsorption of water dimers on a Ni(110) surface 174, 65

Noble gas matrices,
FTIR spectra of base — HF complexes in noble gas matrices 173, 103

Noise in FT-IR spectral data,
noise in FT-IR spectral data processing 175, 329

Nonrigid molecules,
interconversion of conformers by infrared radiation: a theoretical approach based on symmetry of nonrigid molecules 173, 91

Nucleic acid constituents,
hydrogen bonding between nucleic acid constituents and amino acid amide group 175, 283

Numerical convolution,
Raman line shape analysis by numerical convolution 175, 319

OH Bands,
the intensity change of IR OH bands by H-bonds 175, 277

Optical properties,
nonlinear optical properties of organic molecules: a theoretical study with semi-empirical methods 175, 159
Organic conductors,
resonance Raman studies in the organic conductors α- and β-(PEDT-TTF)$_3$I$_3$ and β-(DMPEDT-TTF)$_3$I$_3$ 174, 189
Organic molecules,
nonlinear optical properties of organic molecules: a theoretical study with semi-empirical methods 175, 159
Organometallic dimers,
gas-phase UV photoelectron spectra and DV-Xα calculations of bridged organometallic dimers 173, 313
Oxo-anions,
Raman intensities and polarizability parameters (EOPs) of some oxo-anions of Group V, VI and VII elements in aqueous solution: general trends 174, 35
μ-Oxo linkage,
resonance Raman evidence for μ-oxo linkage in ferriporphyrins 175, 55
4-Oxopyrimidine,
IR spectra and phototautomerism of matrix isolated 4-oxopyrimidine 175, 91
Oxygen radical,
quantum chemical assessment of the structure of an oxygen radical adsorbed on titania and detected by ESR spectroscopy 174, 337
Pathogenic bacteria,
the rapid differentiation and identification of pathogenic bacteria using Fourier transform infrared spectroscopic and multivariate statistical analysis 174, 165
Pattern recognition,
pattern recognition applied to vapour-phase infrared spectra: characteristics of νOH bands 175, 263
Pentane,
electronic absorption spectrum of radiation-produced pentane and hexane radical cations in saturated chlorofluorocarbon and perfluorocarbon matrices at 77 K 175, 47
n-Pentane,
temperature dependent site structure of the phenalenyl radical in n-pentane and n-hexane Shpol'skii matrices 174, 23
Pentatomic heterocyclic compounds,
electronic structure of pentatomic heterocyclic compounds containing N, O, S and Se. Gas-phase UV photoelectron spectra and quantum-mechanical calculations 175, 447
PH_3,
photoionization of the outer- and inner-valence shells of PH_3 in the photon energy range 30-90 eV 174, 135
2-Phenylacetamides,
configurations in unsymmetrically N-methyl-N-cycloalkyl substituted 2-phenylacetamides 174, 315
synthesis and spectroscopic study of some new rigid N-bicyclo substituted 2-phenylacetamides 174, 255

Phenylnitromethane,
thermal decomposition of gaseous phenylnitromethane - product identification by photoelectron spectroscopy 175, 429
Photoburning,
statics and dynamics of amorphous solids studied by photoburning of persistent spectral holes (PPSH) 174, 77
Photochemistry,
infrared spectroscopy of excited states and transients in photochemistry 173, 51
Photoionisation,
absolute photoionisation cross sections of transient species 173, 215
Photoredox reactions,
time-resolved resonance Raman studies of photoisomerization and photoredox reactions in solution 173, 67
Photothermal and photoacoustic spectroscopy,
photothermal and photoacoustic spectroscopy 173, 129
C-Phycocyanin,
conformational study of the chromophore of C-phycocyanin by resonance Raman and electronic absorption spectroscopy 175, 61
Platinum(II),
tuning of the trans-influence in sulfito-complexes of platinum(II) 174, 423
PO_4,
vibrational study of $(NH_4)_2HPO_4$ and $(ND_4)_2DPO_4$ single crystals. The PO_4 ion vibration couplings 175, 295
Polyacetylene,
interpretation of vibrational spectra of pristine, doped and photoinduced polyacetylene 174, 375
Polyaza chain molecules,
vibrational and electronic properties of polyaza chain molecules and their metal complexes 175, 435
Polymethine dyes,
picosecond spectroscopy of polymethine dyes 173, 377
energy and electron transfer processes of adsorbed polymethine dyes 174, 383
PO_3-symmetric stretching,
profile analysis of PO_3-symmetric stretching infrared band 175, 335
PPSH,
statics and dynamics of amorphous solids studied by photoburning of persistent spectral holes (PPSH) 174, 77
1,2-Propanediol,
infrared-induced conformational isomerization and reverse reaction in the dark of 1,2-propanediol in low-temperature argon matrices 174, 1
Propene,
vibrational analysis of propene adsorbed in zeolites Y 175, 189
Proteins,
applications of ultraviolet resonance Raman spectroscopy to proteins 173, 79
fast determination of the quantitative secondary structure of proteins by using some parameters of the Raman amide I band 174, 159

Proteolipid,
conformational structure of the central nervous system proteolipid apoprotein. A Raman and infrared spectroscopic study 175, 43
Pseudoazulenes,
fluorescence lifetime measurements of pseudoazulenes using picosecond-resolved single photon counting 175, 111
Purine,
structure and equilibria of purine in ethanol. An UV study 174, 83
$PV_{14}O_{42}^{9-}$ polyanion,
vibrational and electronic spectra of the $PV_{14}O_{42}^{9-}$ polyanion 174, 401
Pyridine,
electron spin echo spectroscopy of the photo-excited triplet state of pyridine 173, 249
two photon absorption of liquid pyridine: a study using thermal lensing and CARS spectroscopy 175, 147
Pyridine N-oxides,
experimental studies on the UV-spectra of substituted pyridine N-oxides and their perchlorates in acetonitrile 174, 235
Pyrimidine,
vibronic activity in the two-photon spectrum of pyrimidine 175, 153
Pyrrole polymerization,
SERS study of the pyrrole polymerization 174, 363

Quinoline complexes,
an infrared and Raman spectroscopic study of transition metal(II) halide quinoline complexes 174, 435

Radical cations,
a search for pure compounds suitable for use as matrix in spectroscopic studies of radiation-produced radical cations. III. A selection of compounds based on the thermochemistry of hydrogen and proton transfer reactions between neutral molecules and their cations 173, 329
$Re_2(CO)_{10}$,
FTIR study of interaction of $Re_2(CO)_{10}$ with silica and alumina supports 174, 331
Reflectance spectra,
quantitative evaluation of reflectance spectra of light-scattering media 174, 389
Rhenium,
rhenium carbonyl and dinitrogen complexes: identification of intermediates by matrix isolation photochemistry and metal atom synthesis 174, 5

Saccharinates,
bonding of the carbonyl group in metal saccharinates: correlation with the infrared spectra 174, 467
Salicylaldoxime,
a vibrational spectroscopic study of salicylaldoxime in the solid state 175, 377
Salicylic acids,
comparison of the effect of lanthanides (Ln), d-transition metals and selected metals of the main groups on the aromatic system of salicylic and benzoic acids 174, 417

, to the sp.

Saturated alcohols,
the associative behaviour of saturated alcohols with reference to the molecular structure in the OH proximity. An FT-IR temperature study 175, 233
Scandium hexafluorides,
vibrational spectra, phase transitions and force-fields in crystalline scandium hexafluorides 174, 449
Semiconducting hexaborides,
Raman and FTIR investigations of metallic and semiconducting hexaborides 174, 455
Semistable molecules,
HeI photoelectron spectroscopy of organic and inorganic transient and semistable molecules 173, 227
Short-lived molecules,
optimization of gas phase reactions using real-time PES analysis: short-lived molecules and heterogeneously catalyzed processes 173, 31
Silicon carbide,
FT-IR characterization of Si-H bonds on the surface of silicon carbide 174, 369
Silver-coated,
surface enhanced Raman scattering on silver-coated tin spheres 174, 53
Silver sols,
SER spectra of diazines adsorbed on silver sols: spectroscopic evidence of reduction products 174, 351
SiNCX(X=O,S) groups,
UPS and quantum-chemical study of compounds containing SiNCX(X=O,S) groups 175, 411
5-Substituted-3-isopropyl-6-methyl uracils,
^{1}H NMR spectra of some 5-substituted-3-isopropyl-6-methyl uracils 174, 281
Sulfito-complexes,
tuning of the trans-influence in sulfito-complexes of platinum(II) 174, 423
Superbases,
nature of the strong basicity of superbases, unsolvated hydroxide ions? 175, 257
Surface enhanced Raman scattering (SERS),
combining surface enhanced Raman scattering (SERS) and high-performance thin-layer chromatography (HPTLC) 173, 369

Tartaric acid salts,
absorption of some tartaric acid salts and their aqueous solutions 174, 411
Terephtalonitrile,
vibrational spectra and force field of terephtalonitrile 175, 177
Tetracene,
temperature effects on highly resolved laser induced fluorescence spectra of tetracene in solid solutions at cryogenic temperatures 175, 85
Tetrahedral molecules,
description of molecular distortions. II. Intensities of the symmetric stretching bands of tetrahedral molecules 175, 349
$ThBr_4:Pa^{4+}$,
EPR-study of $ThBr_4:Pa^{4+}$ in the incommensurable phase 173, 397

Thiolesters,
matrix-isolation IR studies on the basic interaction sites in esters and thiolesters towards proton donors 173, 349
Tin spheres,
surface enhanced Raman scattering on silver-coated tin spheres 174, 53
Titania,
quantum chemical assessment of the structure of an oxygen radical adsorbed on titania and detected by ESR spectroscopy 174, 337
N-Tozyl(4-dimethylamino)pyridinium salts,
vibrational spectra and structure of N-tozyl(4-dimethylamino)pyridinium salts 175, 221
Transient and semistable molecules,
HeI photoelectron spectroscopy of organic and inorganic transient and semistable molecules 173, 227
Transient species,
absolute photoionisation cross sections of transient species 173, 215
Transition metal compounds,
excited state distortions and their spectroscopic consequences in transition metal compounds 173, 185
electronic structures of analogues and isoelectronic main group and transition metal compounds - a gas phase (UV)-photoelectron spectroscopic and theoretical study 175, 441
Transition metals,
IR study of hydrogen bonds formed by π-complexes of transition metals in liquid xenon solution 174, 29
sym-Triazine,
infrared band structures at the phase transition in sym-triazine 174, 95
Trimethylchlorosilane,
on vibrational relaxation in liquid trimethylchlorosilane 175, 343
Triorganyltetrelomethanes $CH_{4-n}(TtR_3)_n$ (Tt = Sn and Pb),
vibrational spectra, force fields and NMR-data for triorganyltetrelomethanes $CH_{4-n}(TtR_3)_n$ (Tt = Sn and Pb) 175, 171
Triphenylcarbinol and triphenylsilanol,
infrared spectroscopic study of hydrogen-bonded complexes of triphenylcarbinol and triphenylsilanol with ethers 175, 271
Tunneling spectroscopy,
tunneling spectroscopy 173, 141
Two-dimensional NMR spectroscopy,
molecular structure by two-dimensional NMR spectroscopy 173, 17
Two-photon absorption,
molecular proximity effects in two-photon absorption 175, 141
Two-photon processes,
electric-field-induced two-photon processes 175, 135

U^{3+},
absorption and luminescence spectra of U^{3+} in Cs_2NaYCl_6 174, 443
Ultraviolet resonance Raman spectroscopy,
applications of ultraviolet resonance Raman spectroscopy to proteins 173, 79

Uniaxially aligned systems,
vibrational and rotational contribution to IR and Raman bands of uniaxially aligned systems 173, 173
Uracil,
identification of ionic and tautomeric species of uracil by second derivative UV absorption spectroscopy 175, 31
self-association of uracil in aqueous solution. Study of dilute solutions by normal and second derivative UV absorption spectroscopy 175, 19
Urea-phenol,
infrared, cryometric and calorimetric studies on the urea-phenol system 175, 227

Vanadium(V) complexation,
multinuclear NMR study of vanadium(V) complexation with tartaric and citric acid 174, 461
Vibrational intensity spectroscopy,
computations in vibrational intensity spectroscopy 173, 111
Vinylsilane,
vibrational-rotational analysis of some of the fundamentals of vinylsilane 174, 291

Water dimers,
theoretical investigation of adsorption of water dimers on a Ni(110) surface 174, 65
Wiberg indices,
application of Wiberg indices to geometry optimization. C-C distances 175, 203
$WO_3(MoO_3)/\gamma Al_2O_3$ catalysts,
in situ laser Raman spectroscopy of the sulphiding of $WO_3(MoO_3)/\gamma Al_2O_3$ catalysts 174, 71
"Wood"-isocyanate reaction,
FTIR studies of the "wood"-isocyanate reaction 175, 389

Xenon solution,
IR study of hydrogen bonds formed by π-complexes of transition metals in liquid xenon solution 174, 29

Zeolites,
molecular orbital calculations and normal coordinate analysis of CO_2 and N_2O in zeolites 175, 195
Zeolites A,
infrared studies on the interaction of N_2O adsorbed in transition metal ion-exchanged zeolites A 174, 357
Zeolites Y,
vibrational analysis of propene adsorbed in zeolites Y 175, 189
